PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with a strong foundation in data collection, cleaning, analysis, and visualization. Proficient in using analytical tools to transform raw data into actionable insights that support informed business decisions. Experienced in working with structured datasets, identifying trends, and presenting findings through clear dashboards and reports. Demonstrates a problem-solving mindset, strong analytical thinking, and a results-driven approach to data interpretation.

EDUCATION

Bachelor of Engineering (B.E.) , Sipna College of Engineering and Technology, Amravati Expected 2026
Electronics and telecommunication. **CGPA: 7.25**

HSC 12th grade, Maharashtra State Board 2020 - 2022
Percentage: 84.50

SKILLS

Technical Skills: Python, SQL, React, JavaScript, HTML, CSS, PowerBi, Excel.

Framework: Flask

Soft Skills Analytical, Collaborator, Leader, Adaptable

EXPERIENCE

Python Developer Intern - Cognifyz Technologies Jun 2025 – Jul 2025

Worked on Python-based projects focusing on data analysis, automation, and application development. Gained hands-on experience in web scraping, database integration (MySQL), and data visualization. Contributed to developing scripts and tools that improved data processing efficiency.

Offer Letter -[\(Open\)](#)

PROJECTS

Data Retrieval and Analysis using Python and MySQL

Extracted structured data from MySQL databases using optimized SQL queries Processed and transformed data using Python libraries for analysis and reporting. Conducted trend analysis and summarized insights through visualizations. Improved data accuracy and consistency through systematic cleaning techniques.

Tools and Technologies: Python, MySQL, SQL, Pandas, Data Visualization Tools

Web Scraping and Data Analysis Project

Designed and executed a web scraping pipeline to extract structured data from e-commerce websites. Automated data collection using Python-based scraping tools and handled unstructured HTML content. Cleaned, validated, and transformed raw scraped data for analysis and reporting. Performed exploratory data analysis (EDA) to identify pricing trends, product availability, and patterns. Stored processed data in CSV / database format to enable further analytics and visualization

Tools and Technologies: Python, BeautifulSoup, Requests, Pandas, SQL, Data Cleaning and EDA

ACHIEVEMENTS

Founder — HydroDefend Solutions (Registered Firm)

Early-stage venture; product currently in design and planning phase, focusing on solution architecture and feasibility.
